- Counseling Cell, LNMIIT 2017
- Mentored** a group of **13 freshers** as buddy
 - Acted as the **primary point of contact** and guided them in getting accommodated and acquainted to the surroundings and facilities

Experience

Junior Software Engineer, Wissen Infotech (Bengaluru,karnataka)

[Aug'22– Aug'23]

- Created the **Interactive dashboard** using **React JS**, providing real-time analytics and data-driven decision-making support with all the important documents for the Monitoring team.
- Successfully developed a **user-friendly digital ecommerce** website featuring dynamic product carousels, filtering options, and user-friendly navigation.
- Implemented **responsive UI design**, ensuring seamless display on various devices and browsers.
- Collaborated closely with cross-functional teams and designers to translate project requirements into visually appealing and intuitive interfaces.
- Utilized React.js components for modularity and reusability, enhancing development efficiency.
- Integrated backend APIs with **Axios** for smooth data retrieval and updates, ensuring seamless data synchronization.
- Worked closely with the managers of departments to understand what information was to be used to evaluate productivity.

Frontend Developer Intern, Adsys MedTech (Jaipur,Rajasthan)

[Dec'21 – Jun'22]

- Collaborated with a team designer and back-end developers in developing **complete Frontend structure** of the App using React Native, TypeScript, Redux & Tailwind CSS.
- Assessed UX and UI designs for technical feasibility.
- Expanded features, refine code, and improve processes, producing smoother operations and enhancing user engagement.
- Implemented key features like **Form Validation and Login Functionality** for the users.

Freelancing Experience | Independent Projects

[Jun'20–Dec'21]

Blog Application

- Created **Headless CMS Blog App** with features like recent posts, categories, full markdown articles, author information comments.
- It was made **fully responsive** using Tailwind CSS. And we can also manage the blog from a **Dedicated Content Management System (Graph CMS)**.
- Technologies used:** React JS, Next JS, GraphQL, Graph CMS (Headless Content Management System) & Tailwind CSS.

E-commerce Website Redesign

- Collaborated with a team of designers and back-end developers to design and enhance the user experience of an e-commerce website.
- Implemented **responsive web design** using React JS & Tailwind CSS, ensuring optimal display across different devices and browsers.
- Integrated the **front-end with a custom CMS**, allowing the client to easily manage product listings and content updates.

Portfolio Websites

- Collaborated closely with clients to bring their design vision to life by **developing portfolio websites** that accurately reflected the Figma designs provided.
- Designed and **implemented a responsive layout** using HTML, CSS, JavaScript, React JS and Tailwind CSS ensuring an optimal browsing experience on different devices.

Other Projects

- AMAZON CLONE(E-commerce) ([link](#))
- CAS-DM (Chat Application) ([link](#))
- INSTAGRAM CLONE([link](#))
